26 January 1959

SUBJECT: Flight Test Program for Remaining System 4 Equipment

TO: [REDACTED] 25X1A

25X1A

This is in confirmation of your telephone conversation with [REDACTED] on 21 January 1959 in regard to the flight test program desired by Customer "C" for the System 4 equipment remaining to be delivered. I had previously discussed this matter with personnel at Project Headquarters on 20 January 1959. Since System No. 102 is a reworked unit, it is desired that this system be flight tested.

Those modifications presently being developed to suppress aircraft noise in System 4 should be installed on No. 102 prior to flight test. As previously agreed, it is not our desire to flight test System Nos. 106 and 107.
